## GENTLEMEN

Keep Cool, Conditions are Changing—Observe the Signs of the Times.

Woman is a Mighty Factor in the World's Progress—Long Held in Silence.

Her Rights Are Being Recognized and Her Merit Appreciated.

We, in Kentucky, have long been accustomed to women keeping silent that we may be surprised to learn that women have merited and received recognition in other public assemblages than those religious.

In Utah a woman has been elected to the State Senate. Just think of it! Mr. Cannon is a Republican, Mr. Cannon, his wife, is a Democrat. He was a candidate for the Senate; so was she. Result: Mrs. Cannon will sit as a member of that august assembly.

Some man may say: "Yes, that has occurred in Utah; that's where Mormons have ruled; what else could you expect from Utah?"

A special from Denver, Col., says: "These women will serve as Representatives from Arapahoe County. They are Mrs. Olive C. Butler, Mrs. Evangeline Hartz and Mrs. M. A. B. Conine."

We give below brief sketches of the women:

"Mrs. Butler was born in the Charlestown district of Boston, Mass., under the shadow Bunker Hill Monument. In 1866 she was married to Simpson D. Butler, of Lynn, and they removed to Denver in 1890. Mrs. Butler is a great worker in the Woman's Relief Corps, and is post Departmental Secretary for Colorado and Wyoming.

"Mrs. Evangeline Hartz is a daughter of Charles Clay, of Dundas, Prince Edward's Island. During an agitation which arose last year against a proposed bill to prohibit the removal of park purposes, Mrs. Hartz came into public notice as an active worker with other women against the ordinance, which was finally defeated.

The club women of Denver have secured as their representative Mrs. Mary B. Conine. Mrs. Conine is the wife of John M. Conine, a lumber dealer. She is now serving her second term as President of the North-side Women's Club."

Social and politie reforms sometimes come as "landslides," but usually more gradual and imperceptible, so as to change customs of long standing. Here in Kentucky we are rather slow in yielding to such innovations as permit women to hold office and vote, and sway the people with her oratory in public discussion. Of course there are men—good, very wise men—who will object to women being candidates. At the risk of being called "cranks" we wish to state that we are heartily in favor of women being candidates for—marriage. We have advocated this for years, and still do, but we do not advocate it only do we advocate such a candidacy, but we must confess our weakness (?) when we say that so far as is consistent with the Divine will we believe that woman's place ought to be heard and might influence folk in advancing the cause of justice, truth, and justice which make for righteousness and justice, purity or peace, whether it pertains to taxation, representation on school boards, in legislative halls, or in supervising the public and happiness of their fellowmen, against the encroaching and corrupting influence of vices legalized or carried on by common consent.

"Honor to woman, for her it is given to be a mother, a wife, a daughter of heaven. She tends on each other that's hollowed to feeling And keeps ever burning the fire."

## A Card.

The ladies of the W. C. T. U. wish to thank Messrs Chenuant and Baird for the use of the Court House and lights on the night of Mrs. Hoffman's lecture; also thank Mr. Howard for his services which we appreciate. Gentlemen we will not forget our debt of gratitude.

Mrs. GATESKILL.

## Free Pikes.

County Judge Howard appeared before the City Council Thursday night and offered to finish the work being done on Main street between Fourth and Bank row, and put the streets on both sides and in the rear of Court House in good order if the city would allow the free use of their rock quarry to the county. The Judge represented the Fiscal Court in this matter, and the object is to give the new turnpike machinery a trial test, and they have preferred to try the durability of the road in a place where it would have a great deal of heavy travel. The matter was referred to the Improvement Committee with power to act, and it is thought that they will accept the offer and the work begin next Tuesday, when the experts arrive. They are to be here ten days learning local men how to operate the outfit. Judge Howard the citizens of the county will be agreeably surprised when they see what kind of roads they are to have.

Brooks Clay, son of C. F. Clay, has been appointed by the Fiscal Court to the position of Supervisor of Pub-

## A NEGRO ROW.

One Man Fatally Hurt and Another Painfully Wounded.

An affray that resulted in the fatal cutting of one man and the wounding of another occurred on South Mayville street Sunday evening about 7 o'clock.

At the hour named Wm. Hamilton and Tom Everett, negro, both of them full of mean whisky, engaged in a quarrel in the street near Smith & Shrout's livery stable. The first that attracted the attention of those within hearing was Everett's appeal for help, that he was being murdered. At this a couple of negroes ran in to separate the men. Hamilton made a savage lunge with his knife at each of them, succeeding in cutting through the clothes of Oliver Fletcher, but not otherwise injuring him. Upon this Fletcher drew his pistol and shot Hamilton. Officers at this juncture ran up and arrested the entire party. It was found that Hamilton, in his savage attack on Everett, had so well gotten in his work that his victim was

## SUNDAY TRAFFIC

Discussed by the White Ribbon

Women at St. Louis.

International Co-operation in Rail-way Work Essential.

St. Louis, Nov. 14.—At the W. C. T. U. convention this morning Mrs. Caroline M. Wood, of Nebraska, Superintendent of the work among railroad men, reported that Sunday traffic was regarded by the department as a serious infringement upon the rights of employees. Local freight and passenger trains had been generally discontinued on Sunday, but "extra" stock trains were now sent out. An effort was making to reach conscientious Christian men in the stock-raising regions and induce them to refrain from loading stock or having it in transit on Sunday.

Patronage of Sunday mail and passenger trains had been uniformly decimated, and each year diminished the conviction that the ministry and membership of the Christian church were responsible for many of the burdens imposed upon the world's rest day." International co-operation in railway work was essential to further development.

Mt. Sterling.

CARRIED

BY PALMER AND BUCKNER.

One Precinct Captured in the State of Kansas.

The only precinct or township in Kansas carried by Palmer and Buckner, is Dudley township, in Haskell county, in the short grass country. In that township five Democrats voted the Indianapolis ticket and carried it by one plurality. Against this McKinley and Hobart had four votes, Bryan and Sewall two votes and Bryan and Watson one vote.

The Palmer and Buckner men felt so elated over their victory that on the Saturday after the election they mounted broughams and led the McKinley and Hobart and Bryan and Watson voters in chains around the township. The two Bryan and Sewall men stood aloof from the festivities.

The Court of Appeals has affirmed the decision of the Backen Circuit Court, which sentenced to death Robert Laughlin, who in February murdered his wife and niece. He was to hang on September 25th; now the Governor must set the day for execution.

Are Your Dollars Dead, or Alive?

If you carry them in your pocket, they are dead.

If you invest

ten of them in one of our \$10.00 Suits or Overcoats, they will be alive, and return to you big value.

## THE ARMY OF RUSSIA

TWO MILLION FIGHTING MEN, WITH MODERN ARMS.

Would Have a Tremendous Influence in Case of a European War—How the Infantry Is Trained—Artillery Is Particularly Strong—How They March.

As the military forces of Russia on a war footing contain upward of 3,000,000, 600,000 combatants, it would appear that something like that "self-sacrifice does not of itself mean war" would be required to enable any nation of western Europe to settle the eastern question without first consulting the czar. This vast army, trained through the ages in the same empire, liability to service being almost universal, as a rule, serves with the colors lasts for five years, and in the event of a mobilization of the forces the field troops would be brought up, with the men called in to serve who had served in the ranks. The field troops and field reserve troops, together numbering 2,000,000 of men, would be formed into field armies, which would each comprise a number of army corps, rifle regiments, and reserve divisions. This is to be the form of the consti-  
tution of forces and depot troops and imperial militia.

The "three line rifle, pattern 1861," has been introduced in place of the single line battle rifle. The new rifle carries five rounds, the weight of which is of small caliber (.3 inch) and has a smokeless ammunition. On service the bayonet scabbards are left at home, and the quadrangular barrels are carried fixed, and the bayonet is removed and inserted into the bayonet scabbard, which should the white ray disappear. By means of this invention night signals can be made which flashlights and rockets might be useless or liable to betray the position of the gunners. The rifle is graduated and used as a guide to a square line with all other lights out, in dangerous latitudes, as it cannot be seen either to the right or left, but only dead ahead or dead stern. The French admiral-  
taches always to this rifle, and this light, weighs only 9½ pounds, about a pound less than the Lee-Metford rifle and bayonet used in the British service. The gunners are to be armed with carbines of infantry fire—viz., volley fire, which may be used at all ranges; individual fire, which is employed up to 500 or 600 paces; individual concentrated fire (the fire of all the men of a regiment or squad at a time); and up to 1,200 yards a mass fire, greater distance than 1,200 paces. When within 300 or 300 paces of the enemy, fire attains its maximum intensity by the employment of magazine fire. After a successful bayonet charge, the gunners are to be permitted to advance to the tail side of the captured position and press the enemy by a rapid fire. A frontal attack must be supported by one on the flank. When acting on the defensive, infantry must put forth every effort to shade the enemy's fire, and then attack him with the bayonet.

Throughout the Russian cavalry the men are armed with a curved sword, 3½ inches long, and rifle and bayonet. In the Cossacks, the field ranks carry a lance. In artillery the Russian gun particularly strong, and their armament and projectiles are of the latest and most approved patterns. The active army and field reserve troops alone contain upward of 500 battalions, manning over 1,000 pieces of ordnance, which form a closed corps and are recruited from those who pass the general staff academy. The duties of the general staff, broadly speaking, include the movements and operations of the army, introduction of the new and reorganization of the theater of war.

It is laid down that on marches, when at a distance from the enemy, it is of the first importance to study the comfort and convenience of the troops by separating the army into smaller, more compact, and bolder to maneuver, the wants of the troops beforehand. When near the enemy, however, and on a march that may lead to an encounter, the troops advance closed up as much as possible in column and aim mainly at swiftness and secrecy.—*Pot Mal Gato*.

**Bay Rum and Canvassbacks.**

At the Authors' club the other evening Howard Paul related this anecdote of the late Charles Read, the novelist, who was something of a gourmet. He had heard so much about canvassback ducks that he desired to taste them. Mr. Paul said, "I will let you know when I have a chance to try them." Mr. Read, superintendent of the D. S. sea mission, reports:

"At Square Island we found an anxious crowd. Not a family had enough to prevent starvation this winter and no means of getting food. We arranged to supply 250 pounds of flour, 200 pounds of bacon, 100 pounds of molasses, 100 pounds of tea, in return for which the people will saw wood, which we hope to sell next summer. An enormous boon is conferred upon these settlers even by such small assistance as this. Quits and invalids are now invalids. Most have an utterly inadequate supply of bedding."—*New York World*.

**Another Collection Craze.**  
"Did you receive cards?"  
"Yes, sir."

"Why, Joe Jolally is going to give a private exhibition of his collection."

"Collection of what?"

"Why, don't you know? For a year or more Joe has been cutting out all these little pictures of girls in the dry goods advertisements—posters and things, you know, and putting 'em on cardboards. They say it's the finest collection in the country."—*Cleveland Plain Dealer*.

**Her Musical Attire.**

When the British bluejackets landed after the bombardment of the palace at Zanzibar, the wife of the late sultan was still in the city, and the sultan had lost her in her excitement. It would never do to face the infidel with out a veil. The agitated sultana did not hesitate, and when the bluejackets found her she was discreetly dressed in a musical box, which was the only toilet she had.

**Whalebone May Be Higher.**  
Advices received from the Arctic ocean whaling fleet state that the entire fleet will be in the North Pacific up to Oct. 1. In consequence of the poor catch of whalebone will be in the neighborhood of \$6 per pound.

## A WONDERFUL LIGHT.

French Invention of Great Value in Naval Maneuvers in War.

Orbits recently there has been brought out by French inventors a mysterious device known as a ratrave, or the ratrave light. It is a thing of small dimensions and is placed on the deck of the vessel. It throws out an electric light that can only be seen when a rat is near. A ratrave is constructed as follows: a square box has within it at one end a concave mirror, in front of which is adjusted an arc light. The light is placed within a plan convex lens placed midway of the length of the ratrave. The light is directed through a projected through a silvered tube as a bundle of parallel rays. By the sides of the outer end of the silvered tubes are placed two prisms, one of red and the other of green glass, and through which a portion of the light passes in diverging rays. At a distance of seven miles the light of a ratrave appears as a small point, and consequently difficult of detection to those not knowing the quarter in which to look for it. Its detection is easily rendered possible within a radius of a few feet at such distance.

The use of the red and green rays is for the purpose of enabling the vessel to which the signal is addressed to know in which direction to steer so that the white ray disappears. By means of this invention night signals can be made which flashlights and rockets might be useless or liable to betray the position of the gunners.

light of a ratrave appears as a small point, and consequently difficult of detection to those not knowing the quarter in which to look for it. Its detection is easily rendered possible within a radius of a few feet at such distance.

The use of the red and green rays is for the purpose of enabling the vessel to which the signal is addressed to know in which direction to steer so that the white ray disappears. By means of this invention night signals can be made which flashlights and rockets might be useless or liable to betray the position of the gunners.

At a distance of seven miles the

## Address of Mrs.

Frances Beauchamp.

## CIRCULATING LIBRARY.

The grateful appreciation of this matter, together with facts learned of such an absolute reading master as to make education a doubtful blessing, led to the following recommendation. That a Library Committee be appointed by this convention; that we call upon all Unions that are able to contribute a library of twenty or fifteen volumes and a nest case bearing name of the Union. This case shall be sent free of cost to any Union, Church or Missionary Society desiring it on following conditions: the receiver shall pay express from last point, shall on receipt of the library send two postal cards, one to the Union owning library and one chairman of Library Committee. They shall then have free use of the books for such time as the committee shall deem wise, at expiration of which time they shall forward it to another Union. At time of forwarding notices shall be sent to Library Committee, and express receipt sent to the Union to whom the library belongs. I think such an outfit could be procured for twelve or fifteen dollars, and there is no estimating the good we could accomplish.

No organization has such scope as the W. C. T. U. It is Christian, and as Christian it sees a field of usefulness wherever there is need of relief. Under our compulsory law there is need of some one in every community to look up the children that do not go to school and see that they comply with the law. Each child, white and black, has so much expended by the State for its education, and we should see that it receives the benefit. Is it kept from school for want of clothing? Then let the Union make a call for second-hand clothing and see that it is comfortably clad. This will open the way to the hearts of the teachers and give you such influence that you will be greatly aided in securing the enforcement of the state title temperance instruction law. If this work of clothing the poor children is systematically undertaken, you will find the great majority of them want clothing because the wages of father and mother go to the saloon. In Chicago we found that in one district there were five hundred and seven decent families. "The head" or "natural protector" of three hundred of these were habitual drunkards, and of 200 they were regular drinkers, leaving only seventeen out of the 517 families that were not brought to want directly by strong drink. You will also in this way yourself better learn the needs of temperance teaching, both in the day school, the Sunday School and the Loyal Legion. I am greatly grieved because so many of our Unions are without a Loyal Temperance Legion. This must be remedied in some way. I hope that we may keep Mr. Field, who is an expert in children's work, in the State for some time, and I wish that every Union represented at this convention would, while here, arrange with Mr. Rivers, State Superintendent of the L. T. L. to have Mr. Field visit them, spend several days and start the work. Then we could and ought to reach the children more effectively through the Sunday School. Bible temperance is the strongest temperance teaching. It gives no uncertain sound; its command does not stop with drink, not, but says "good, not," and that command was given when the light wine had not more than 5 or 6 per cent. of alcohol, not fortified as they are to day with distilled spirits. A man of that day had to be a glutton before he could be a glutton; how much more is it in force to-day? "My people die for lack of knowledge" should be embossed over every saloon door, engraved on every drunkard's tombstone and embazoned over every communion table, where fermented wine, the emblem of disease, death and decay, is substituted for the fruit of the vine, the emblem of life.

Many and deep have been the regrets expressed to me, as I have moved about the State, over the expansion of the State organ. If these Unions would rise up and say: "We will each pay one for one month's issue of the paper, which will be about \$25.00, and we will take it out in subscription," we could then bring out the paper at 25 cents a year and make it run headquarters. For we should have headquarters, with a talon on us as you would over a fal-

newspaper, and the stenographer should be one who could edit the paper. If I could have had such a paper through which to speak to each of you every month of the year, I would have esteemed it a privilege and blessing, and we could make it a power in our mission work. Each State Superintendent would thus have a trumpet put to her lips with which to blow a blast that would reach the farthest corner of our work.

I speak elsewhere of keeping Mrs. Field in Kentucky for the Loyal Temperance Legion work. If we could combine Loyal Temperance Legion and Organizer it might be well. We need a State Organizer that could and would go up and down the State working on the new territory, and we are fortunate in being able to find one who could combine L. T. L. and W. C. T. U. Organizer. Every cent of money put in this work is a fine investment; every new Union furnishes new hands to help lift the temperance banner and throw off the load of the liquor traffic. There is one other question that is very near my heart. In the eastern part of our State there are whole counties without the gospel. In all that territory there are few women who know how to make a nest, sweep or dust a room, or make or bake a loaf of bread. I wish the W. C. T. U. would establish a settlement on the plan of a college, settlement, in some portion of this state territory, and try what could be done toward teaching domestic sciences. Inasmuch as "beauty is next to Godliness," and as the "body is the temple of the Holy Ghost," and should therefore be properly nourished and clothed, I believe that the funds necessary to carry on this work, with the proper effort, could be raised entirely outside of the working force of the W. C. T. U. Among our well-wishers who would give to this work, but would not give to other lines of our work, I believe the returns would be indefinitely greater than in any city settlement.

What are you doing along the line of purity? This work can best be effected through the mothers' meetings or parents' meetings. Many a low soul will, I fear, point to another and father and say, "You are to blame; you knew the truth and you did not tell me, or I would have been saved." The outcasts, down-trodden women are increasing each year. There are two hundred and thirty thousand women between the ages of 16 and 30 living this awful death in the United States, and at the lowest estimate not less than five men to one woman. Every year about forty-six thousand of these women find graves in the potter's field, and still the hand of the despoiler takes a larger number from honest homes, thus making the total every year an increase. Where is the remedy? Where is relief to be found? We answer, in intelligence, set over against ignorance. First, let us work for better laws; let the disgraceful law that the girl-child of twelve, a mere baby, can consent to her ruin and consign herself to a life of shame before she knows what she is doing, while her partner in this awful tragedy may go scot-free, though a villain of mature years—let such a law be abrogated from our statute books. I hope and expect our superintendent of this department to put before you the form of such a bill, and that it may be introduced into our next Legislature; also the form of a petition which we want each local Union to circulate. Let us send in to our next session of the Legislature such a list of petitioners that they will not dare to adjourn until a law is put on our statute book that will be a protection to innocent, ignorant girlhood. Let the parent reverence the human body as the temple of the Holy Ghost, and then they can teach their children. Let the child get its first lessons on the origin of life from the parent, and not from an impure source. If parents shrink from this plain duty it is because they have not been properly taught. I recommend as help to this work "Child Confidence Reward," "Almost a Man," by Mary Wood Allen; "Talks With a Child," No. 1 and 2, by M. A. L., with the "New Crusade," published by Wood-Allen Publishing Co., Ann Arbor, Michigan, as tracts and a periodical that no home with growing children can afford to be without. With these tools any consecrated mother with the grace of God can save her child, even from the stream of vileness that is deluging our land. But, mothers, you must come to the point where you would feel just as badly over a talon on you as you would over a fal-

daughter, before you can raise sons that will not strike down daughters just as sweet and lovely as your daughter. You can bring your son to a point where they will have a worthy ambition to be like the God man. You can bring, I say, not send, him to see that Christ was no mere God manifested than he was man manifest. A prophecy of what man is to be as truly as a revelation of what God is. How? Not by low ideals, not by feeling or saying, "Oh, he is a boy," but by seeing and feeling that he has the high honor of being a part of the body of Christ. To do this you must always be on the alert, you must be consecrated and use all your God-given powers. To do this you must not cling with a helpless inability, but stand in a noble independence and interdependence; you must rise to the standard assigned to you by the Creator, that of being a "mankind"; that word help has meaning of the servant idea in it; it is not help rendered by an equal or superior being, and if women is to fill this divine commission she must learn to lift and not to lean.

There are two kinds of people on earth—day and night kinds of people, no more, I say. Not the same end, for the 'tis understood. The good are half bad, and the bad are half good.

Not the rich and the poor, for to count a man's wealth you must know the state of his conscience and health.

Not the humble and proud, for in life's little span who puts on vain airs is not counted a man.

Not the happy and sad, for the swift flying years bring each man his laughter and each man his tears.

Not the two kinds of people on earth I mean, are the people who LIFT and the people who LEAN.

And odd enough with which kind we are, and only one left to satisfy who LEAN.

In which class are you? Are you casting the load of overtaxed lifers who tot down the road?

Or are you a leaper who lets others bear Your portion of labor and worry and care!

[END.]

## For Dyspepsia

And liver complaint you have a print guarantee on every bottle of Shiloh's Vitalizer. It never fails to cure

Where "Hard Times" Are Un-known.

The large profits of the Mormons as farmers financially are exhibited in the Atlantic Monthly for November by William E. Smythe, and the showing is remarkable. In the 40 odd years since these people settled, virtually penniless, in Utah, they have expended \$563,000,000 for the cost of maintaining Church and State, the two having been virtually one. All this, excepting \$20,000,000 brought in by immigrants, was the product of farming by irrigation. Each Mormon farmer enjoyed an average income of \$482 a year above the cost of living. Each has been compelled, moreover, to give a tithe every year to the Church. Broadly speaking, all the farmers are proprietors and non tenants. The land in Salt Lake City was originally parcelled out in an ingenious manner, so that all should share equally in its appreciation. Professional and business men receive 14 acres apiece in the center; mechanics five acres apiece a little farther out; then 10 and 20 acres lots to farmers, according to the size of their families. Water for irrigation and were owned by the community, each man holding shares according as he had contributed labor to their construction. The farmers were taught to diversify crops and raise what they needed for themselves rather than specialties, and the consequence was a never-failing product and complete self-sufficiency. They have never felt "hard times."

Stores, factories, banks and industrial enterprises generally were conducted on the co-operative plan a joint stock companies. The tango-joint co-operative mercantile institution, which includes stores, a boot factory and other departments, has paid an average of 9 1/2 per cent. dividends yearly for 27 years. The capital stock is now over a million dollars.—American Agriculturist.

## Grover in the Deal.

New York, November 10.—W. C. Whitney, who has lately bought large tracts of land in Wethersfield, L. I., for President Cleveland and himself, yesterday purchased 47 additional acres for \$12,049.23.

The former Secretary of the Navy now owns over 20,000 acres of ground in the vicinity, and has bought about 100 more for the President.

## A Fact Worth Knowing.

Consumption, LaGripe, Pneumonia, and all Throat and Lung diseases are cured by Shiloh's Cure. For sale by Thos. Kennedy.

TRADE TREATY

## Canadians Expect from McKinley

## Since They Have Money

## Cinched.

The statement made in New York by Hon. W. S. Fichting, Canadian Finance Minister, that a treaty will be made by the Canadian Government to secure a treaty of reciprocity with the United States as soon as President-elect McKinley shall assume office at Washington, has awakened the greatest interest among business men in Montreal and throughout Canada.

The commercial interests of the Dominion, regardless of politics, are almost a unit in favor of a renewal of what is known as the "Elgin" reciprocity treaty of 1854, and it is believed that when the representatives of the Canadian Government visit Washington next spring they will endeavor to secure reciprocity legislation along the lines of that treaty. The principal provisions of the Elgin treaty were that free trade be established in many branches of business, in which the Canadians have the advantage, and in return thereof for United States fishermen may fish in Canadian waters, and are privileged to buy bait and dry their nets on the dominion shores.

## HON. C. T. CALDWELL.

## Of Parkersburg, W. Va. Recommends Wright's Celery

## Capsules

Parkersburg, W. Va., Jan. 26, '95.  
THE WRIGHT MED. CO.,  
Columbus, Ohio.

Gentlemen.—I have been using Wright's Celery Capsules since Nov., 1894, and find them to be recommended. I first began taking them while at Hot Springs, Ark., under treatment for Sclerotic Rheumatism. Liver, stomach trouble and constipation with which I had been a long sufferer. I found the Celery Capsules gave me great relief from the beginning and have used them ever since. With pleasure, and unsolicited, I recommend them to any and all suffering with like afflictions or either of them. Truly yours,

Karl's Clover Root Tea purifies the blood and gives a clear and beautiful complexion. For sale by Thos. Kennedy.

## MASSACRE

## In Which One Hundred Armenians Are Killed

Constantinople, Nov. 10.—Another massacre has been committed in the Armenian village of Erek. One hundred persons were killed and nearly all the Armenian houses were pillaged.

There is no joy in this world equal to the happiness of motherhood. A woman finds ample compensation for her loss in the body nestling close to her own—in the trusty clinging of her little hands, and the love shown in the little eyes.

A woman's health is her dearest possession. Her love and her constancy depend on her health. Almost all of the sick and infirm are the result of some direct or indirect some derangement of the organs distinctly feminine. Troubles of this kind are best removed by a physician of great and proper modesty keeps women away from physicians, whose influence upon a woman's health is often detrimental, especially as useless as it is common.

Dr. Pierce's Favorite Prescription for the cure of all diseases of the womb, is as follows: "A woman who has been chief consulting physician of the World's Dispensary, and who has taken care of over 100,000 cases by untimely birth, in the eighth month of my every pregnancy, and called, 'The best physician in the world,' who has never failed me, has prescribed the following: Four doses quenched my pains. That child was born at full term, when I was three years old, and I am the happiest mother in the world."

## PERSONAL MENTION.

W. H. Holt, of Frankfort, is in town.

R. S. Scobee, of Winchester, called on Monday.

T. S. Andrews, of Flemingsburg, was in the city yesterday.

A. M. Ogg, of Olympia, spent Sunday and Monday in the city.

Mrs. Wm. Fisher, of Paris, is visiting the family of James Bogie.

Mrs. Shockley, of Flemingsburg, is visiting her brother, W. P. Shockley.

Miss Emma Turnbull, of Wheeling, is visiting friends in this country.

M. W. Neat, business manager of Farmers Home Journal, called on us Monday.

Miss Margaret Woolford has returned from a visit to Miss Elizabeth Van Meter, at Danville.

Miss Allie Gay, who has been visiting the Bridgforth family, returned to her home Monday.

Misses Ramsey and Scobee of Winchester, are the charming friends of friends and relatives in the country.

Mrs. Henry Will, George Clayton and Dr. H. H. Gervis, of Salt Lake, were visitors to our city Monday.

M. E. D. Baxter, of Carlisle, was in to see us on Monday. His county gave Palmer and Buckner 19 votes.

Dr. J. B. Spratt on Saturday returned from Lebanon, Mo., where he went to visit his sister, who is sick. She is improving.

Mr. Father Barnes, of Detroit, here in the city several days. He came to see his daughter, Mrs. Squire Turner, who is very sick.

Mrs. French and Scobee, of Winchester, were visitors in the city Sunday, where—

“cupid's virus dart seems to be playing havoc.”

Mrs. Lucy Morris, who will leave next week for New York, has just got a job and accepted a position as designer and cutter in a large establishment.

Miss Annie McClelland, who for some time has been visiting her father's family, will on tomorrow, accompanied by her little son, stay for their home in Tehuantepec, Mexico.

Miss Maud Wallace, of Mexico, who had been visiting in Baltimore, Md., and Washington City, stopped over in this city for a short visit to relatives en route to her home.

Col. Thomas Johnson and wife left yesterday morning for Middlebury, Vt., on a vacation. His many friends here hope for his speedy and permanent recovery.

Judge L. Apperson, G. L. Kirkbride, James B. White and W. P. Oldham left Sunday morning for a hunting trip to Ballard county. They expect to be gone about ten days.

## RELIGIOUS.

Do not forget the prayer meetings Wednesday night.

The Women's Prayer Meeting will be held at Christian Church on Saturday at 2:30.

Rev. John R. Evans, Presiding Elder, preached two excellent sermons at Methodist Church on Sunday.

Rev. M. D. Madox, recently elected pastor at Howards Mill and Jellesserville, will preach at Howard's Mill on the fifth Sunday in this month.

The Thanksgiving service will be held this year at the Baptist church. Service will be preached by Rev. J. W. Mitchell of the Methodist church.

Rev. J. H. Taylor, of Charleston, S.C., will preach at the Southern Presbyterian church next Sunday at 11 a. m., and at Old Springfield church at 2:30 in the afternoon. All are cordially invited to hear him.

A message was received on yesterday morning announcing the death of Mr. Jay Planck, an aged and highly respected citizen of Fleming county. He was a brother of Mr. James Planck, and a brother-in-law of M. M. and A. J. Cassidy, of this city.

A protracted meeting will begin at the First Presbyterian church in this city next Sunday morning. The pastor will be assisted by Rev. —— Porter of P. E. Wesley. Mr. Porter is a preacher of great attractions and has accomplished great good where ever he has been. The public is cordially invited to attend these services.

At the First Presbyterian church, Sunday morning and evening, the pulpit will be filled by the pastor Rev. A. J. Arick. There was a fair attendance at both services. A special feature of the day was the singing of Miss Flora Samuel.

The B. Lane, of Flat Creek, drew the state at W. W. Reed's. This was no lottery scheme.

## HER DREAM DISSIPATED.

Gall Hamilton's idea of a woman's Bank from Cincinnati.

“Gall Hamilton,” said a Philadelphia banker to a Bulletin reporter recently, “was a very able woman, but like a good many other women, and men, too, for that matter, she didn't understand finance. Her ignorance on this subject led her into a grave mistake at one time, and thereby hung one of the most curious tales of human incredulity that ever came to light.”

“About 20 years ago a woman named Howe opened a bank of deposit in Boston. It had several peculiar features, among which were: It was owned and operated by women; the accounts only of women were solicited, though there was a proviso that the sterner sex should be allowed the privilege of depositing money, though under no circumstances would they ever be allowed a voice in the management; no limit was to be made in ordinary savings, as to the amount that would be received on deposit.

“This was all very well, and if there were nothing made the innovation might do—Boston. But the circular wound up with the startling announcement that the rate of interest would be 8 per cent a month! Not only that, but this rate of interest was in all cases to be paid in advance!

“One would think that such an act would bring about a revolution in any intelligent community, but it wasn't, and the bank was actually in operation in Boston for over a year. The concern was located in a fashionable quarter of the city and did a rattling business. The Howe woman, if she didn't understand banking, as she afterward acknowledged at her trial, certainly understood the business she was engaged in, which was simply to get the most out of the people.

The bank was patronized by such and love, rich and poor, and her every outward evidence of prosperity.

A few of the known ones, who got in on the ground floor, made money out of it, for it was only necessary for one to deposit \$1,000, say, and get back \$1,480 in six months.

“It was only by accident that the concern was exploded. A servant girl in the family of a bank had an account in the name of Mrs. Howe, and her name was very well known.

“The story went into the papers, and the banks and the business was the consternation among the women folks, and Mrs. Howe came out with a pronouncement, saying that the bank was all right and would continue to do business, but in three days the concern was closed by the sheriff, and Mrs. Howe was arrested.

“Gall Hamilton was among the women who got in. She wrote a two column article in defense of Mrs. Howe, in which she intimated very plainly that the failure of the bank was entirely due to the jealousy of the men; that Mrs. Howe and her system were all right, and that all bankers could pay 8 per cent a month if they wanted to.

“The outlet of the crater, or point of origin of the bank, was on the western side, where small masses of black obsidian and white incrustations of lime were observed.

—Professor A. S. Packard in Popular Science Monthly.

They were kin.

“The best joke I ever heard was on me,” said J. D. Bafford to a reporter.

There is a woman in Wise county, Va., in the heart of the mountains, in the southwestern part of the Old Dominion. I am a Virginian, and in common with all loyal Virginians claim kinship with every one of my name in the state. The landlord saw my name on the register.

“So you're name is Buford?” he said.

“Yes.”

“Uster be sum Bufords hyar.”

“Well, they must have been relatives. My family are all Virginians.”

“Yase. Yo do favor 'em. Reck on all yur air kin. Yo look jest like Davo.”

“My father's name was Dave.”

“Thar war three—Bob, John and Dave.”

“I have uncles by those names. They are family names.”

“You' sho' air kin. I thought so, min' I look at yo.”

“Reck on the Bufords, moved away.”

“Not zactly.”

“I thought you said they used to live here.”

“That's what I sed. Yo' see, John an' Dave was Bob's sons. The ole man was gwine to marry agin, so the boys wouldn't git the little propety the ole man had, an' they kill'd 'im; so we hung John an' Dave.”

“I did not trace the relationship or the family resemblance any farther.”—Washington Star.

A Gentleman's Children.

A peasant was taking some pearls to his new seigneur, who was exceedingly ugly. As he entered the house he found two large apes dressed in uniform and with swords at their sides. They seized his basket and devoured, each of them, a dozen pearls.

The peasant, who had never seen creatures of this kind, saluted them courteously and allowed them to do what they pleased. When he had made his present, his seigneur, laughing, asked him why he had not brought his basket full. “Because,” he replied, “messieurs vos enfans as I entered seized my basket and took those that are missing.”—Cornhill Magazine.

Out of Hearing.

The class to be promoted stood before the teacher, who was making out her list of pupils.

“What's your father's first name?” she inquired of one of the pupils.

Mystified silence.

“What does your mother call him?”

“Nothing.”

“Oh, she must have some name for him. When she wants him, what does she call him?”

“She don't call him at all,” was the reply. “He's dead.”—Pittsburg Bulletin.

A Good Listener.

Don't let your eyes wander when a story is told you that taxes your patience, or endeavor to hear some more “your ‘yes’ and ‘no’ will sound unappropriately and your intelligence put to a severe test. It has been written.

They are never alone that are accompanied with noble thoughts.” but when you mix with your fellows and move in the world of society above all things let those thoughts be “seated in the hearts of courtesy.”

## MOUNT SHASTA.

How It Feels Up Near the Crater In the Month of August.

Look down from the top of a selected level place near a bank of snow on an elevation of about 9,500 feet, and, gathering a few logs of dead pines, we made a rousing fire, and at night fall unrolled our heavy California blankets, sleeping nearer the stars than I ever had before. It was a clear, cold night. The water froze nearly an inch thick, and at 6:15 the next morning, when we began our ascent of the crater, the thermometer was 25 degrees below zero. The temperature of the air was 45 degrees, and at 10 o'clock we came to the foot of the ash cone, and by 8:45 were on the summit of the crater. The view in the clear atmosphere was indeed a wide one. Far to the northwest was the Siskiyou range and Pilot's Knob, and to the west the jagged, saw toothed, snow peaks of the Salmon mountains; 50 miles southward was the snow clad solitary Lassen peak, 12,000 feet high, while Klamath lakes and the lava beds, the seat of that late Modoc war, lay to the north eastward.

The scene was a wild one within the great crater, whose narrow edge is formed of sharp, jagged peaks and pinnacles. Broad, almost unknown snowfields extended from the edge down for 1,000 feet. At the bottom were two frozen lakes like sheets of glass. The crater was extensive, no signs of steam or smoke from recent eruptions meeting the eye. We were told that on that is the vent which the steam vent, the hot dry, smoky, and of violent action. Mr. Sisson, while guiding a traveler to the summit, was once bolted and had to spend the night there and saved the lives of himself and his companion by lying close to the steam vent, the steam passing up through the snow. On their descent they slid down over the snowfields of the summit to the lava beds below.

The outlet of the crater, or point of origin of the lava, was on the western side, where small masses of black obsidian and white incrustations of lime were observed.

## Christian Endeavor Convention.

The first annual convention of the Fourth Kentucky District of Christian Endeavor assembled at the Christian church in Winchester on Saturday morning, October 30.

Rev. A. J. Arrick presided. The meeting continued until Sunday night. There were about seventy delegates in attendance, of which 25 were from this county. The district is composed of fourteen counties. Much interest was manifested in the convention. The addresses and papers were instructive and inspiring. Miss Bettie Roberts conducted the Sunrise Prayer Meeting on Sunday morning. Among the speakers we notice Mrs. Bessie Ellis, who has visited our town, and whose subject was "Junior Work." Professor Pearce, of Winchester, gave a magnificent address on "Christian Citizenship." Miss Straffer, State Secretary, of Louisville, subject, "God's Call, Our Answer;" Prof. Hubert, of Lane Theological Seminary, subject, "Missions and the Suppression of War;" Miss Minnie L. O., Lexington, subject, "What more can we do for the Master."

The consecration service on Sunday night was conducted by Mr. Fred Wallace, of Hopkinsville, and participated in by many. The outlook for C. E. work in the district is bright.

The following officers were elected:

Rev. James A. Francis, of Winchester; President; C. W. Foley, of Versailles; Vice-President; J. R. Boatman of Kingston; Secretary; Miss Virginia Hearne, of Lexington, Treasurer; D. L. Pendleton, of Winchester, Chairman Local Committee.

The following resolutions were adopted:

"We congratulate the Christian Endeavorers of the Fourth district upon the organization of this Union, and urge upon all the Societies of the district to give it their loyal support, and that they will pray that it may become the means of great good in the work of extending the kingdom of the Master in the bluegrass region of Kentucky."

2. We recommend the formation of local unions in all cities and towns where there are two or more societies; that the several counties form county unions; that the Corresponding Secretaries promptly furnish the local, county and district Secretaries with all data and other information regarding their Societies to the end that the organizations may be more compact and that the members may be better in touch with the work.

3. We recommend that more attention than ever be paid to the work in prisons and jails, and declare it to be our earnest conviction that great good may be accomplished in this way.

4. We recommend that there be formed in every Society Christian Citizenship Committees and that these work be pushed along this line.

5. We recommend that greater efforts be made in the work of Christian mission—homes and foreign, and that in this line each Society of any strength endeavor to plant or foster one additional Society as a special year's work, and that during the winter all help possible be rendered weak Sunday S. hosts in outlying districts.

6. We recommend that the work among colored people be pushed and that each Society appoint a special committee for this purpose.

7. That the thanks of this Convention be tendered the good people of Winchester for the royal way in which they have entertained us; this church for their special efforts and the use of its house of worship; to the local committees for their untiring efforts in their behalf; to the railroads for liberal reduced rates, and to the local press for courtesies extended.

## Gray Hair Made Dark.

I saw in your paper a statement that Zulu Vulier would restore any head of hair to natural color in three weeks. As I was very gray I sent for a sample package, and in less than three weeks my hair was perfectly restored to natural color. My wife's hair was a light red, and by using Zulu Vulier, her hair is now a beautiful auburn. Anyone can get a sample package of Zulu Vulier by sending 21 two-cent stamps to Wilson & Co., New Concord, Ohio, and be married Wednesday night in Danville, Elder Robert Campbell, of Glasgow, brother-in-law of the groom, performing the ceremony. Elder Walden and bride contemplate a removal to Fort Scott, Kansas, where Mr. Walden has had a call to a prosperous church—Kentuckian-Clitzer.

In the Art Galeries—Pisasant Weman (noticing a man copying one of the old masters)—"Why do they paint this picture twice?" Her husband—"Why that's obvious. When the new picture is done they hang that on the wall and throw the old one away."—Fiegele Blatter.

## Children Cry for Pitcher's Castoria.

## A Wife Equal to a Gold Mine.

Will some of your readers give me a good recipe for making cold starch? I am selling self-heating flat irons and iron a little at every hours and have to use some starch at every place and want to know how to make good cold starch. My husband was in debt and I am being anxious to help him, thought I would sell self-heating flat irons, and I am doing splendidly. A cent's worth of fuel will heat the iron for 3 hours, so you have a perfectly even heat. You can iron in half the time and no danger of scorching the clothes as with the old iron, and you can get the most beautiful gloss. I sell at nearly every house, as the iron saves so much fuel everybody wants one. I make \$1.50 on each iron and have not sold less than ten any day I worked. My brother is doing well and I think anyone can make lots of money anywhere selling irons. J. F. Casey & Co., St. Louis, Mo., will start anyone in the business, as they did me, if you will address them.

Mrs. A. Russell

## Hog Cholera "Remedies."

Take one pound each of sulphur, copperas and madder, one-quarter pound each of black antimony and salpeter, once ounce of arsenic. Purvize and mix thoroughly and give one teaspoonful daily to each hog. If they are sick give this dose twice a day.

Separate well from sick ones, leaving the latter where they are. Sprinkle a weak solution of crude carbolic acid about the pens. Keep quarters clean and give pure water and who some food.

A good cholera preventive is the following: For twelve hogs give one tablespoonful of copperas dissolved in drinking water once every month or two. Keep the animals' quarters clean. The disease is more easily pre-empted against than cured!—American Agriculturalist.

The Republicans now have a clear majority in the Kentucky legislature. Last spring that body stood, Democrats 68, Republicans 68, and Populists 2. The Republicans lost five by death and resignations and the Democrats three from the same causes. Special elections were held Tuesday to fill these eight vacancies; the Republicans elected seven and the Democrats one. This makes that body now stand, Republican 70, Democratic 66, Populists 3. Governor Bradley has signified his intention to call an extra session soon, which will elect a successor to Senator Blackburn.

Ed Linney, the Republican who was elected to the State Senate from Louisville to fill the vacancy caused by the death of S. Senator Weisberger, Democrat, was formerly a printer over at Harrodsburg where he was called "Beefsteak Ed." It is said that he got the name from eating at one time two and one-half pounds of raw beefsteaks, topping off with a pound of beetroot and two pies. He must still have these cannibalistic tastes as he went for Democratic opponent blood raw hawing him 4,449 votes in a district usually Democratic.

Elder Wm. P. Walden, son of Elder Jesse Walden, of Lancaster, and Miss Lillian Brewer, of Harrodsburg, were married Wednesday night in Danville, Elder Robert Campbell, of Glasgow, brother-in-law of the groom, performing the ceremony. Elder Walden and bride contemplate a removal to Fort Scott, Kansas, where Mr. Walden has had a call to a prosperous church—Kentuckian-Clitzer.

## Heart Disease Cured

By Dr. Miles' Heart Cure.

Painting, Weak or Hungry Spells, Irregular or Intermittent Pulse, Fluttering or Palpitation, Burning Sensation, Shortness of Breath, Swelling of Feet and Ankles, are symptoms of a disease or weak heart.

MRS. N. G. MILLER.

For Wayne, Ind., writes on Nov. 29, 1894: "I am a man of 40 years of age, weak, feeble and suffered until agony. I had weak, hungry spells, and my heart would palpitate so hard, the pain would be so severe and torturing. I became so weak and nervous, I could not sleep. I consulted several physicians without relief and gave up ever being well again. About two years ago I consulted Dr. Miles' Heart Cure. One bottle of the Heart Cure stopped all my troubles and the Restorative Nervine did the rest and now I sleep soundly and attend my household and social duties with many pleasure."

Sold by druggists. Books sent free. Address Dr. Miles' Medical Co., Elkhart, Ind.

Dr. Miles' Remedies Restore Health.

We are authorized to announce JOHN E. GROVES,

as a candidate for the office of County Superintendent of Schools.

## FAKES

Are Some of the Stories About the New Industries Started Recently.

Chillicothe, Nov. 12.—How political statistics of the resumption of business are manufactured is shown by a dispatch purporting to be from this city, published in the New York World on Sunday in an article headed "Unparalleled Resumption of Business in Four Days." Among the dispatches is one dated "Chillicothe, Ohio," and in it was given a list of industries said to have opened up and increased their force since the election. In it were the following:

Business. Men. Marion Wagon Works Co. . . . . 200 National Tin Plate Co. . . . . 100 American Wire Nail Co. . . . . 400 Columbia Encasite Tile Co. . . . . 50

Of these four only the Marion Wagon Works exists, and it employs about 40 men. No new industries have opened here since the election; none were shut down before it. The shops of the B. and O. S. W. Railway cut their force and working hours three or four months before election, and began increasing the force and lengthening the time just after it, which they might have done sooner.

In the same article in the World is given the little village of Anderson, in Ross County, Ohio, which boasts one grain elevator and a blacksmith shop. The World, however, credits it with the "Arcade Tile Company" and the "Anderson Iron and Bolt Company," the two employing 150 men, and operated since election. The blacksmith shop has been magnified into a bolt works and the proprietor and his boy have grown to be 100 men—paper.

## TOP NOTCH

In Lumber Prices To Be Made Soon—Big Advance.

Chicago, November 10.—A local paper says: "The Lumbermen's Association of the city met, with a full attendance, last night and advanced prices from 50 cents to \$1 a thousand feet, and say they may go still higher. Lumber has been on a steady decline since 1893. The dealers who took prices say they have only taken step toward the prices they will ask before next spring if the tide of property continues. Some dealers believe lumber will sustain an additional advance of from one to two dollars a thousand feet, increasing amount of building serving as the warrant for the subsequent advances."

## FIRST ADDRESS

In the Campaign of 1900 Made By Senator Pettigrew.

Sioux Falls, S. D., November 10.—Senator Pettigrew opened the campaign of 1900 last night and addressed one of the largest audiences ever gathered in this city. It was announced the beginning of the biennial fight of four years hence.

The Senator said that he would render McKinley every aid possible for him to demonstrate that the tariff was what all the country, but wanted to put himself on record by saying that he would resist every section of a tariff bill that provided for tariff by a trust. This created a sensation and the demonstration followed was tremendous. The Senator was followed a great reception at the close of his speech.

## The Ills of Women.

Constipation causes more than half the ills of women. Karl's Clover Root Tea is a pleasant cure for constipation. For sale by Thos. Kennedy.

## DOLLAR WHEAT.

An Advance of Thirty Cents a Bushel in Three Months.

New York, November 10—"Dollar wheat" appears to be in sight, and the prospect is that the flow of gold from Europe will soon be resumed. Cash wheat, No. 2 red, the standard grade, sold to-day in New York at \$4 a bushel. On August 14 last it sold at \$6. The grain, therefore, in less than three months has been 30¢ a bushel.

## A Baby's Life Saved.

"My baby had cramp and was saved by Shiloh's Cure," writes Mrs. J. B. Martin, of Huntsville, Ala. For sale by Thomas Kennedy.

Dr. Miles' Nerve Plasters for Rheumatism.

## Offensive Catarrh

Catarrh is seemingly one of the most complicated of ailments, and one which the doctors are absolutely unable to cure. The reasons for this are easily explained. Catarrh is a blood disease and only a various remedy can effect it. Various sprays, douches and washes which are employed in a long time may, for a time, alleviate the trouble, but no one ever knew of such treatment producing a cure, as the experience of many suffers will prove; nothing can do except stop the blood remedy.

In the treatment of Catarrh, S. S. has demonstrated the fact that it reaches deep-seated diseases, which other remedies can not touch.

Chas. A. Park, the leading wall paper dealer, of Athens, Ga., writes:

"For months I suffered from a severe case of catarrh. The many offensive

symptoms and the impossibility of finding a remedy which would not only stop the disease but not affect the body, caused me to despair. I consulted Dr. Miles' Heart Cure and it stopped all my troubles. I am now well again and have no trouble with my health or social duties with many pleasure."

Sold by druggists. Books sent free. Address Dr. Miles' Medical Co., Elkhart, Ind.

JO. N. PHIPPS, Attorney-at-Law, Mt. Sterling, Ky., Office in trading room in Traders' Deposit Bank building, up stairs in Post office in Montgomery and adjoining committee.

MR. CHAS. A. PARK.

symptoms are frequently accompanied by severe pains in the head. I took several of the medicaments recommended for catarrh, and various local applications, but the disease had become so deep-seated that they had no effect whatever. I was alarmed at my condition, and I was compelled to submit to a doctor who had a special remedy which had apparently descended to the lungs, ending in consumption. I was induced to take S. S. (Swift's Specific), and after two months the disease affected well and never felt any effect of the disease since."

S. S. is the only blood remedy which it is impossible to imitate. It is a substitute for most of them, for they are all alike—contain the same ingredients, and are made in the same way. It is a substitute for S. S. as it is in every way different from every other remedy made. It is a natural remedy, being made from various herbs gathered from the forests, and contains not a particle of mercury, potash or any drug. It is not a drug remedy, and is a safe and a strong remedy which can be obtained from a chemist's shop. S. S. (Swift's Specific) is the only blood remedy which guarantees to be well.

Deep-seated and obstinate blood troubles, such as Cancer, Scrofula, Carbuncles, Ulcers, Tumors, Tumors, Blood Poison, etc., which often remedies do not reach, yield readily to the curative powers of S. S.

Books on various diseases will be mailed free to any address: Swift Specific Co., Atlanta, Ga.

## Treat the Hog Better.

I saw a hog without hair last spring. Without examining it quite accurately, I know how the hair was lost. The animal had not had a clean nest all winter. Its bed was cold, damp and moldy. Many a morning when the mercury was playing about zero, the owner would call the hog from the bed to be fed. It came to the steaming hot. This killed the hair and it dropped out. It is a wonder it did not kill the hog. If it pays to you to have your horse and cow every day, it pays to have the hog a month at least.

When you see your hogs steaming, you are losing money. The average farmer is apt to forget that naturally the hog is one of the neatest of animals.—W. L. Anderson, Montgomery Co., Indiana.

\$63.55. \$63.55

To the City of Mexico and Return

On November 6th and 9th the Iron Mountain Route will have on sale from Cincinnati, round-trip excursion tickets to City of Mexico, at rate of \$65.55, account Pan-American Medical Congress, with final return limit of December 31st. # The Store That's Always Crowded!

Because We  
Always Undersell  
Every House  
In Everything.

It is easy to understand how we do the largest business in Mt. Sterling. We buy newer goods than any other house, pay spot cash, and in consequence get inside prices. Moreover, any advantage the manufacturer can give, is given to us; such as closing out the balance of a stock at reduced prices. Our prices, in view of these facts, are beyond the competition of other houses.

## We Do The Business.

For Bargains and honest dealing, come to Mt. Sterling's Great Bargain House—

## "The Louisville Store" of HAYS & NEWMAYER.

### French Peas at Baum's.

### HORSE AND TRACK.

London is enjoying a great race of horseless vehicles.

Five cents a pound is quoted as the price of live turkeys in Anderson county.

No obligation to justice does force a man to be cruel, or to use the sharp sentence.—Jeremy Taylor.

Scarsasm is the language of the devil; for which reason I live long since as good as renounced it.—Carlyle.

Fine Cakes and Crackers—10c to 20c a pound. No finer goods can be made.

CHILES THOMPSON GROC. CO.

On Thanksgiving night Rev. Dr. W. T. Belling of Lexington will lecture at the court house in Paris, on Old Fellowship. The lecture will be free and no collection taken up. Dr. Belling is one of the finest speakers in the State.

In his annual report to the Secretary of War, General Miles reviews his former recommendations for an increase of the army. He thinks it should be fixed at a minimum of one soldier to every 2,000, population and a maximum of one soldier to every 1,000 of population.

On the morning of the 14th instant, fire destroyed the stable on the farm of Mrs. W. E. St. John, near Lexington. The stable contained eighteen horses, nine of which were burned. The great mare Josie B. was burned; her mate, Miss Rita, was saved. Josie B. and Miss Rita held the world's team racing record, 2:09 1/2, recently made at Lexington.

When Baby was sick, we gave her Castoria. When she was a child, she craved for Castoria. When she became Miss, she clung to Castoria. When she had children, she gave them Castoria.

We finish in this issue the address of Mrs. Francis Beauchamp, President of the Kentucky W. C. T. U., delivered in this city recently. We invite careful reading of this address by every reader of the ADVOCATE. The temperance question is vitally connected with the prosperity, morality, happiness and salvation of our State and nation. A great battle is to be fought. Our homes must be protected from the ravages of the liquor traffic. Let not the opportunity to read this address pass unimproved.

### Constipation

Causes fully half the sickness in the body. It retains the digested food too long in the bowels and produces biliousness, torpid liver, indi-

**Hood's Pills**  
ggest, bad taste, coated tongue, sick headache, in somnia, etc. Hood's Pills cure constipation, cleanse the body easily and thoroughly. 25c. All drugs. Prepared by C. I. Hood & Co., Lowell, Mass. The only Pills to take with Hood's Sarsaparilla.

### Louisville Tobacco Market.

Sales on our market for the week just closed amounted to 1,749 lbs., with receipts for the same period 529 lbs. Sales on our market since January 1 amount to 146,928 lbs. Sales of the crop of 1895 on our market to this date amount to 141,418 lbs.

Owing to the great interest in the Presidential Election the warehouses concluded it was best not to have any auction sales during that week, so there was no tobacco sold at public outcry until this week.

The Burley market opened on Tuesday a little irregular and some easier, but continued to improve and closed strong with prices fully as high as at any time this fall. A few hogsheads of new burley were sold, and the market for such was decidedly better.

With a good handing season we would expect a decided increase in receipts and sales.

The following quotations fairly represent our market for burley tobacco 1895 crop.

Trash (Dark or damaged tobacco) \$1.00 to \$1.50.

Common color trash, \$2.50 to \$4.00.

Medium to good color trash, \$4.00 to \$6.00.

Common lugs, not color, \$2.50 to \$3.50.

Common color lugs, \$4.50 to \$7.00.

Medium to good color lugs, \$7.00 to \$9.00.

Common to medium leaf \$6.00 to \$9.00.

Medium to good leaf, \$9.00 to \$14.00.

Good to fine leaf, \$14 to \$16.

Select wrapper leaf, \$16 to \$26.00.

The above quotations are not applicable to green and frosted crops.

### Glover & Durett.

### Two Lives Saved.

Mrs. Phoebe Thomas, Junction City, Ill., was told by her doctor she had consumption and that there was no hope for her, but two bottles Dr. King's New Discovery completely cured her, and she says it saved her life.

Mr. Thos. Eggers, 139 Florida St., San Francisco, suffered from a dreadful cold, approaching consumption, tried without result every thing then bought a bottle of Dr. King's New Discovery and in two weeks was cured. He is naturally thankful.

It is such results, of which these are samples, that prove the wonderful efficacy of this medicine in cough and colds. Free trial bottles at W. S. Lloyd's drugstore. Regular size 50c and \$1.

### Hazel Green Herald.

Rev. Isaac Murphy, one of the oldest preachers and most respected citizens of this section, died, at his residence in Morgan county, this morning, aged about 65 years. He leaves a large family and many relatives and friends to mourn his loss.

Uncle Jimmy Lansdown, aged about 80 years, died at his residence, on Stillwater last Sunday, after a long illness. He leaves quite a large family and a host of friends and relatives to mourn his loss.

Joel Fesler has died. Dr. Daniel Colic Cure for years and has never lost a horse by colic. He can't say enough for it. For sale at J. B. Tipton's drug store.

### A Good Wind Mill—Make it Yourself.

I made one of the People's wind mills which I saw recommended in your paper recently. It only cost me \$0.40 and is a splendid mill; my wife doesn't like it, but it pumps it all right and with very little wind; the neighbors all like it, and as I am a kind of carpenter, I have agreed to put up nine mills already, on which I can make a nice profit, and there are many others for whom I can put up mills this fall. I don't see why every farmer should not have a wind mill, when they can make it themselves for less than \$10. Any one can get diagrams and complete directions for making the wind mill by sending 18c to me, to pay postage, etc., to E. D. Wilson & Co., Allegheny, Pa., and there can be dozens of them put up in any locality by any one that has the energy to do it.

### A Farmer.

### County Court Items.

Mrs. Amanda H. Stone sold eleven acres of land on Greenbrier to Emma Nickle for \$1,000.

Mrs. Martha C. Quisenberry, of this city, sold to A. M. Ogg, of Olymnia, her residence on corner of High and Queen streets for \$2,316.

The will of Jas. S. Wills was probated. Also that of Jacob See.

Peter Kelly sold to Mrs. Mary A. Hastic 39 1/2 acres of land on Hinkston Creek for \$2,761.50.

### Old People.

Old people who require medicine to regulate the bowels and kidneys will find the true remedy Electric Bitters. This medicine does not stimulate and contains no whiskey nor other intoxicant, but acts as a tonic and alterative. It acts mildly on the stomach and bowels, adding strength and giving tone to the organs, thereby aiding nature in the performance of the functions. Electric Bitters is an excellent appetizer and aid to digestion. Old people find just exactly what they need. Price 50c and \$1 per bottle. At W. S. Lloyd's drugstore.

A partial canvas of the city shows that trade with the merchants was good. We give some reports:

Dr. Guthrie & Co.—Business good. We got our share.

Hays & Newmeyer—We could not buy on the trade.

Chenault & Punch—A fine trade.

A. Baum & Son—Trade excellent.

Chiles-Thompson Gro. Co.—Fine trade. The "revival" has set in.

Oldham Bros.—Larger trade than last Court Day.

Trimble Bros., wholesale grocers, were well patronized.

Hazell Green Herald.

Upon the application of creditors, the Ferris Wheel and its belongings were fined \$5 each for blocking the street while swapping horses.

One paid his fine and four were locked up. Others were dismissed with a warning by Judge Turner.

The situation in Cuba is favorable for the Cuban Captain General to make a bold stand for his country. The efforts of Spain to conquer the Cubans have thus far failed. Rumors are current of a conflict between Spain and the United States; but you know the election is over and the big paper must have something to talk about. Hurrah for Cuba!

were fined \$5 each for blocking the street while swapping horses.

One paid his fine and four were locked up. Others were dismissed with a warning by Judge Turner.

The situation in Cuba is favorable

for the Cuban Captain General to make a bold stand for his country.

The efforts of Spain to conquer the Cubans have thus far failed. Rumors are current of a conflict between Spain and the United States; but you know the election is over and the big paper must have something to talk about. Hurrah for Cuba!

Ferris Wheel a Failure.

Upon the application of creditors,

the Ferris Wheel and its belongings

were fined \$5 each for blocking the street while swapping horses.

One paid his fine and four were locked up. Others were dismissed with a warning by Judge Turner.
